

TalentEd Grow

Encourage consistent educator development with a professional learning solution that brings together evidence-based insights on areas of need and high-quality job-embedded learning.

Reinforce the connection between professional growth and student achievement

Educators who spend their days focused on student achievement require consistent, individualized learning to facilitate their own development and achieve professional goals.

TalentEd Grow manages all the components of planning and managing professional learning, so educators and leaders can focus on strategic growth, not documentation.

That means teachers can review and enroll in tailored professional learning from an easy-to-use, personalized course catalog. School administrators can create professional learning plans and manage processes and workflows, and district leaders can create an online catalog of learning resources and courses with relevant recommendations for educators.

Grow facilitates individualized learning while complimenting existing professional learning processes through partnership with Teaching Channel, which provides:

- Seamless integration with existing professional development (PD) content.
- Additional supports for teachers aligned with school teaching frameworks.
- Micro-credentialing and relevant PD to grow teaching staff.
- And more.

FEATURES & BENEFITS

Exclusive access to premium library:

- Self-paced courses focus on key learning objectives using video, collaboration, readings and assessment exercises.
- Course ratings, reviews and comments assist in selection decisions.
- Framework alignments promote content resources to individual users.
- Transcripts record user's completed courses.
- Search, preview and interact with each learning opportunity before purchase.
- Aligns with InTASC standards.

Popular features for administrators:

- Create an online professional learning catalog of all resources and customized courses.
- Manage, monitor, recommend or require all professional learning activity, including budgeting, credentialing and scheduling.
- Analyze and compare progress throughout the district.

Popular features for educators:

- Search the course catalog and quickly find all applicable learning opportunities.
- Register and track progress with transcripts that include course completion status and credits.
- Complete online courses anywhere, anytime.
- Communicate with peers through professional learning communities.

Empower talent. Elevate education.
